THE MESSENGER™

*Breaking in is
the easy part...*

Windows 95/98/ME

The Messenger

Nearly six million visitors come to the Louvre every year to marvel at its collections. They all know the Mona Lisa or the Venus de Milo, and some of them come to admire the pyramid designed by Pei. However, very few visitors know that they are entering a building that is more than eight centuries old. This is a monument whose walls have welcomed the greatest figures in the history of France. Constantly reshaped, demolished and rebuilt, the Louvre still bears the signs of an age-old history, sometimes happy, sometimes tragic.

Thanks to your investigation with Morgan, you'll be able to discover the nooks and crannies of the Louvre castle. Many of its historical rooms have been reconstructed using plans and ancient documents. They will accurately conjure up the decorations of the period. You will meet many historical characters who have left their mark on their time. Their reactions, behaviour and psychological profile in the game scrupulously match the information that modern historians have on them.

There is no better way to begin a journey of discovery through the history of France than with this adventure through the corridors of time...right into the very heart of the royal household.
